AIM AND SCOPE

Forest Systems is an international peer-reviewed journal. The main aim of **Forest Systems** is to integrate multidisciplinary research with forest management in complex systems with different social and ecological background. To fulfil this integrative approach, **Forest Systems** gives preference to papers that bring together two or more disciplines, organisms, or forest products and services. Studies about all kind of forest systems are welcomed, in particular those that provide a wide variety of wood and non-wood products and ecosystem services such as the forests in regions with a Mediterranean climate.

Forest Systems is indexed in **Science Citation Index** and **Scopus**. Additionally, in **Agricola**, **Agris**, **Biosis**, **CAB Abstracts**, **CABI full text databases**, **Current Contents Connect** (Agriculture/Agronomy), **Dialnet**, **DOAJ** (Directory of Open Access Journals), **FSTA** (Food Science and Technology Abstracts), **Georef**, **Global Health**, **ICyT**, **Pascal**. It is also included in the following automated directories: **Jake**, **Latindex Catalogue**, **Redalyc**, **Ulrich's Periodicals Directory**.

Forest Systems is published four-monthly (April, August and December) by the *Instituto Nacional de Investigación y Tecnología Agraria y Alimentaria* [Spanish National Institute for Agricultural and Food Research and Technology] (INIA), Autopista A-6, km 7.5, Madrid, Spain.
